

Class: I Subject: Science Chapter: 1 Topic: Plants and different types of Plants Week: 1 Day 1 Date: _____

Students' Learning Outcomes (SLOs)	Methodology	Time 80min	Resources	Assessment
By the end of the lesson, students would have: - identified the plants. - explored the different types of plants (Trees, Herbs, Shrubs/Bushes).	Introduction: - Inform the students that today we are going to learn about the plants and different types of plants. Engage: - To grab the interest of the students, ask the following questions: ---What do you know about plants? ---Are plants living things? ---Do all plants are same? ---What are the different types of plants? ---What does a plant need to grow? (food, air, water) - Write their responses on the board. - Wrap up by saying that plants are living things and important for our lives in many ways. - Explain that plants have different sizes and shapes on the basis of which they are classified as trees, herbs, shrubs, creepers and climbers. Explore: - Take the students to the school garden and get them to carefully observe the plants around them. - When students are observing the plants around them, point out the different types of plants (trees, herbs, shrubs or bushes creepers and climbers). - Ask them to look out for plants growing in unusual places like between cracks on the ground, on the wall or on the roof. - Ask them to identify and record the different plants they observe on the chart paper/ drafting pad. Explain:	2 10 25 15	Chart paper/ drafting pad	Students will be assessed on: - identifying the plants. - exploring the different types of plants (Trees, Herbs, Shrubs or Bushes).

• What did the students learn in this lesson? • What were they not able to do / understand?	• What went well? How do you know? • What went wrong? How will you fix it?
