

Class: II Subject: Science Chapter: 1 (A Green World) Topic: What Are the Different Types of Plants Week: 1 Day 2 Date: _____

Students' Learning Outcomes (SLOs)	Methodology	Time 60min	Resources	Assessment
By the end of the lesson, students would have: Identified the different types of trees.	Introduction: - Inform the students that today we are going to learn about the different types of plants (trees). Engage: - To grab the interest of the students ask the following questions: ---What do you see in the garden? ---Are all the trees/plants of a same height? ---Do they have same size or types of leaves? ---Do all plants have flowers on them? Explore: - Divide the class into group of four. - Take them to the school garden and ask them to carefully observe the different types of trees around them. - Bringing them back to the class ask one student from each group to present different parts of a tree (root, fruits, branch, leaf, trunk) in front of class. Explain+ Elaborate: - Ask the students to read the textbook pg. 8(only trees). - Explain the different types of trees, their structure and benefits. - Explain why trees are important to us and animals also. - Ask the following questions: ---What are trees? ---What type of stem they have? ---What are the benefits of trees?	2 10 15 20	Drafting pad	Students will be assessed on: Identifying the different types of trees.
